Australian owned cooperative.*

STRATEGIC PARTNERSHIP PROGRAM

The Strategic Partnership Program continues an ongoing commitment to assist members improve the profitability of their farming businesses.

While our breeding services aim to increase farm production and income, this initiative is designed to reduce costs.

As part of their agreement with Genetics Australia our partners undertake to provide members with better value when purchasing goods or services. This may take the form of a discounted price, the provision of additional value at the same price, or a combination of both.

Our partners also make a small, activity based contribution to the Cooperative which will assist with the provision of scholarship and training programs.

Cost reduction is always important. We urge you to take advantage of the offers outlined in this catalogue. You will achieve savings and at the same time assist the Cooperative in its ongoing efforts to serve members.

Feeding for profit, breeding for profit

Riverbank Stockfeeds is the only Victorian manufacturer of dairy feeds that allows farmers to choose either meal or pelleted feed options. Its plant is one of Australia's most modern and is Feedsafe-accredited.

As a result we provide our customers with high quality dairy diets at a competitive cost.

Riverbank Stockfeeds and Genetics Australia bring together the synergies of breeding and feeding.

We're both focussed on improving client profits.

Try our nutritionally-balanced dairy feeds for more milk and more money.

THE OFFER

Reduce your feed costs. Quote your Genetics Australia membership number when you order and receive a discount of \$5 per tonne. We'll also provide you with free technical advice.

Find out where you can place an order and start saving money. **Phone 03 9731 0911, fax 03 9731 0922 or e-mail sales@riv.com.au**

Spray solutions for all farms, large or small

GoldAcres is a progressive Australian company which specialises in manufacturing innovative, highly-engineered spray equipment.

We have a very comprehensive range, with something for virtually any farm requirement.

GoldAcres has a reputation for equipment that is accurate, reliable, easy to use and built to take tough conditions.

Our designs incorporate cutting edge technology.

For farmers with small-scale spray requirements, GoldAcres has many options to choose from.

For example, 20 and 50-litre Spot-Mate sprayers ideal for use on ATV bikes, Tray-Mate sprayers which run off a 12 volt connection, compact trailers and cordless rechargeable sprayers for around the garden and sheds.

For the slightly larger jobs, GoldAcres offers a Junior Trailing Compact with 200, 300, 400 and 600 litre tanks.

To see our latest catalogue, visit our website, www.goldacres.com.au

THE OFFER

Register your Genetics Australia membership number at www.goldacres.com.au/register/genaust and receive a 7.5% discount from the web shop.

To find out more about GoldAcres' extensive range of innovative, highly-engineered spray equipment, phone **5342 6399**.

Heritage seeds

High quality dairy pastures

Heritage Seeds is one of Australia's leading suppliers of high performance dairy pastures. We have the country's largest private seed and plant research facility and our co-operative research and development programs extend across the globe.

Heritage Seeds has achieved its position through an ongoing commitment to research focussed on developing pasture varieties suited to Australia. A combination of new variety development, quality seed production, excellence in customer service and our "can do" ethos allows us to provide members of Genetics Australia leading edge performance and quality.

Some of our recently released pastures varieties for the Australian dairy industry are Bealey, Barberia and Hulk ryegrasses, the Sardi range of lucernes and Sustain white clover. This year we are releasing two new perennial ryegrasses called Arrow and Alto that are particularly suited to high performance dairy pastures.

THE OFFER

Genetics Australian members will receive free technical advice on the fit of our latest varieties to your farming operation. Call our experts to discuss and request one of our representatives to make a visit. Also ask about visiting our trial demonstrations in your area and if you qualify for a free trial sample of our latest varieties.

For further information and contact details for your local representative, phone **1800 727 007**, or visit www.heritage.com.au

Built tough for all terrain types

From humble beginnings, Polaris has become Australia's favourite all-terrain-vehicle (ATV) brand. This is testimony to not only an exceptional product, but a dedicated team of staff and dealers. Polaris' huge growth in the ATV market comes as little surprise considering its leading role in ATV technology and development.

It has pioneered features such as Electronic Fuel Injection, Independent Rear Suspension and a host of other features.

Of course Polaris recognises there's more to having just a great product. It also offers a comprehensive range of Pure Polaris accessories designed to match its machines better than anything off the shelf.

Polaris today has more than \$1.8 billion in sales worldwide.

THE OFFER

Best possible prices. Also, purchase a Polaris X2 500 EFI before the end of December 2007 and receive a GoldAcres 100L SpotMate sprayer FREE. Plus, your nearest Polaris dealer will provide a free on-farm demo and appraisal of existing units for trade in.

For more information on Polaris, call your local dealer on **1300 654 142** or visit **www.polarisindustries.com.au**

Leading the way on liquid feeds

Champion Liquid Feeds is a key supplier to feedlots, dairies, pasture-fed sheep and cattle, feed mills and the equine industry.

Products have been specially-designed to enhance animal health and production in each segment and for each animal type.

In addition, Champion Liquid Feeds have developed free-flowing products, easily pumped with mono or gear pumps, as well as efficient systems to deliver their products in simple and cost-effective ways.

All products in the range have a minimum dry matter content of 68 – 70%.

Dry matter content is critical in evaluating the value of other products and determining relative costs on an "as fed" basis.

Liquid feed supplements with low dry matter levels contain little or no readily available energy.

Animals chew dry feed and drink water to get everything into solution so their digestive systems can get started, but liquid feed supplements are already in digestible form.

THE OFFER

Contact us and quote your Genetics Australia member number to qualify for strategic partner prices.

To find out more details about how Champion Liquid Feeds' offer can benefit you, contact **1800 333 010**, fax 1800 024 267.
